

METROPOLITAN GOVERNMENT OF NASHVILLE AND DAVIDSON COUNTY

To: All Prospective Offerors

From: David Friedlander
Contract Specialist

Date: April 14, 2010

Subject: Amendment # 3, RFP 10-38; 800 Mhz P25 System Upgrade

Acknowledge receipt of the amendment with your offer. Failure to do so may subject the prospective offerors to disqualification. This amendment forms part of the above-mentioned procurement and clarifies the previously issued documents.

Vendor Questions:

Is it a correct statement that you do not want the use of Digital Vehicular Repeater Systems (DVRS) to satisfy the coverage requirements?

Yes. The use of DVR systems will not satisfy coverage requirements.

At the Pre-Bid meeting, it was stated that the requirement for mandatory building testing (Section 6.4.1, 6.4.4, and 6.4.9) would be replaced with a post install evaluation that would provide the City with coverage data for future BDA procurement. Is this a correct interpretation of the Pre-Bid discussion?

That is correct. The intent of this RFP is for in-building coverage testing to be performed at the listed facilities, and the results provided to Metro for evaluation purposes. No corrective actions will be required for deficiencies found except within a listed facility with pre-existing BDA equipment.

Could you provide a list of addresses and/or coordinates for Mandatory Buildings to be tested post install?

Yes, those addresses and contacts will be provided after the contract is awarded.

Is it a correct statement that the Cost Data table in the RFP should show unit pricing for the Subscribers?

Yes. Pricing information for subscriber costs should be per unit, as delivered, including all options and accessories. Five year costs would include any extended warranties and/or maintenance plans, software/firmware update agreements, or other costs of long term ownership, excluding batteries.

At the pre-bid conference it was discussed that Software Maintenance Services (section 7.2) were to include all proposed third party network equipment. Is this correct?

Yes.

Will Metro provide storage space for radio equipment during project implementation?

Yes.
